

Hazardous Materials Declaration

This form is to be completed and submitted in conjunction with an application for a Building Permit where the proposed works include **alterations or renovations within an existing structure or the demolition of a structure.**

The information provided here is intended to assist the Building Official in determining if a Hazardous Material Survey (HMS) in accordance with WorkSafeBC guidelines has been completed. If a HMS has not been completed, the Building Official will request further information regarding the scope of the project and the presence of any potential asbestos-containing or other hazardous materials prior to entry into the building. If deemed necessary, the Building Official may request that a HMS be produced. If one cannot be produced the Building Official may cease the inspection for safety reasons.
